

UPDATE NEWS

The past nine months have been just fantastic for the museum. Lots of good letterpress equipment and supplies have been donated to us, and several individuals have seen the merit of the museum and have made generous contributions to our operation expenses. Over 100 people have toured the museum. In the fall we will begin moving equipment and supplies up to the second

floor, and expanding our training capabilities in order to educate anyone who wants to learn about letterpress printing. Check out some of interesting things that are now in the museum.

Grand Opening 2.0!

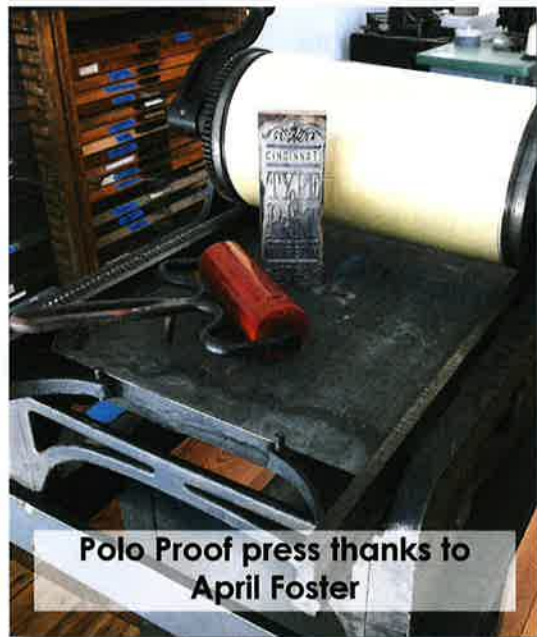

On August 3, 2018 we had our second grand opening 2.0! The new attached building is now finished and most of the donated letterpress equipment has been installed in the museum. It was a fun day, as over 60 people attended the Open House. Many thanks to Brad Underwood of Local 12 News who did an excellent job telling our story. Please Google "Letterpress Printing in Lower Price Hill" and watch the video.
